About Us

Kabata Kitchen Studio is one of the leading kitchen set companies in Bali, offering complete services from design to kitchen interior production. Founded in 2021, we are committed to delivering high-quality kitchen sets tailored to each client's needs.

Supported by an experienced professional team, we continuously strive to provide the best workmanship with excellent production quality and customer service.

Our Materials

Material

HPL

HPL (High Pressure Laminate) is a coating material commonly used in kitchen sets because it is strong, scratch-resistant, and easy to clean, as well as resistant to mild heat and moisture. Available in a wide range of colors, wood grain, stone, and modern finishes, HPL is a practical and economical choice for creating aesthetic and functional kitchen sets.

Material

Duco

Duco is a paint finishing for kitchen sets that produces a smooth, elegant, and luxurious appearance with matte or glossy surfaces. This material allows flexible color options, but requires extra care as it is more sensitive to scratches and impacts.

Material

Veneer

Veneer is a thin layer of real wood used as a kitchen set finishing to provide a natural and elegant appearance. This material highlights the natural wood grain with a luxurious impression, but it requires good maintenance as it is more sensitive to scratches compared to synthetic materials.

Material

Solid Teakwood

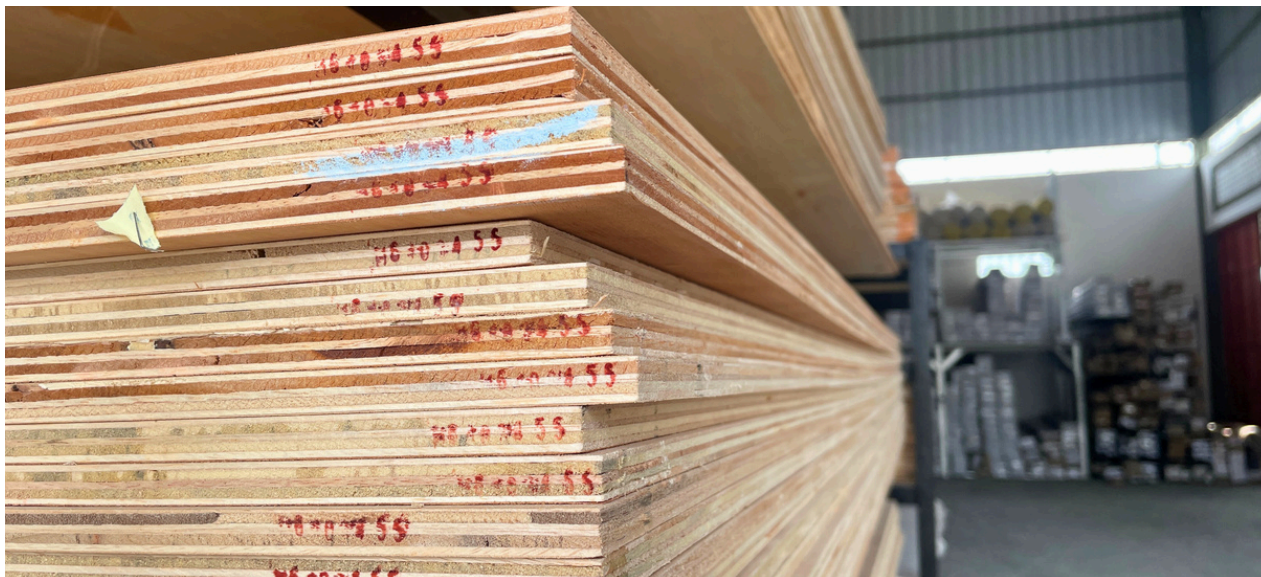

Solid teakwood is solid teak material used in kitchen sets, known for its strength, durability, and resistance to moisture and termites. Its natural wood grain provides a luxurious and warm impression, making it a premium choice with long-term durability.

Material

Plywood

Plywood is a manufactured wood material made from several thin layers of wood that are glued and pressed into a single sheet of board. Each layer is arranged with the grain direction alternating to ensure greater strength and stability.

Material

Marine Plywood

Marine plywood is a type of high-quality plywood specifically designed to withstand water and high humidity. This material is made from selected layers of wood without voids and bonded using waterproof glue, making it stronger, denser, and resistant to delamination even when exposed to water for extended periods.

КАБАТА

Kabata Kitchen Studio's service flow is designed to be simple, transparent, and professional starting from discussing your needs and kitchen design references, followed by initial estimation, site survey, material selection, through to the design process, production, and installation—all done gradually and measurably so that the kitchen set created truly matches your needs, taste, and the quality you expect.

Our Workflow

Service Flow

1. References & Project Requirements

The client provides design references, appliance requirements, photos of the existing kitchen, and the room/kitchen dimensions.

2. Initial Estimation

Our team prepares an initial cost estimation based on the provided references and measurements.

3. Commitment Fee & Site Survey

Once the initial estimation is approved, the client proceeds with the Commitment Fee payment. Our team then conducts an on-site survey to take detailed measurements and assist with material selection.

Service Flow

4. Design & Quotation

Based on the site survey and the client's preferences, our team develops the design proposal and prepares the quotation.

5. Down Payment & Working Drawings

After the design and quotation are approved, the client makes the Down Payment (DP). Our team then prepares the working drawings, which serve as the production guideline.

6. Production & Installation

Production begins once the working drawings have been approved, followed by professional installation at the client's location.

Clients and Partners

We are proud to be trusted by various clients and partners who have grown together with Kabata Kitchen Studio from homeowners, developers, to business partners with a commitment to delivering quality kitchen sets, functional designs, and professional, transparent collaboration.

Thank you Kabata Kitchen Team for making my dream kitchen come true. Professional detailed and structured.

Amelia

A very professional and friendly Kitchen Design studio, could not be more happy with them. They transformed my dream into reality. No matter how small or big your kitchen projects are, you're assured of the best service.

Dimas

Kabata helped me turn an ugly grey concrete "bali style" kitchen into a beautiful pink and blue masterpiece! Efficient, professional, on time, and very flexible while I changed my design plans many times. Deffo recommend.

Sarah

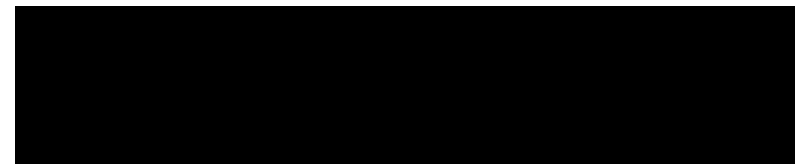

Kami menggunakan jasa mereka untuk membangun dapur di 8 vila kami di Uluwatu. Pelayanan dan kualitasnya sangat bagus. Salah satu kontraktor dapur terbaik di Bali.
